

Numerical report of the student's practical training on obstetrics and gynecology

Student _____

Group _____

Year _____

Name of tutor _____

Place of practice (city, medical institution) _____

Activity, skills achieved	Wate hed	Took part	Carried out by myself	Sure can do
1. ambulatory examination of pregnant women (number)				
2. ambulatory examination of gynecological patients				
3. External obstetric examination				
4. external measuring of pelvis				
5. measuring of diagonal conjugate				
6. Estimation of laboratory data: 1) null, 2) functional diagnostics tests 3) hystological investigation 4) hormonal probe 5) USE 6) X-ray (ГЦГ) 7) hysteroscopy, laparoscopy				
7. Listening to the foetus' heart beat				
8. estimation of biomonitor foetus investigation data				
9. Estimation of the supposed foetus body weight				
10. Determination of the delivery date				
11. Finding out OИГ-recto3				
12. Sanitary treatment of parturient woman				
13. Estimation of the labour activity				
14. Estimation of neck of uterus state and labour biomechanism				
15. Help at cephalic presentation				
16. Help at pelvic presentation				
17. Application of forceps at childdamaging operations				
18. Bleeding prevention in the third period of childbirth and in the earliest postnatal stage				
19. Blood substitute fluids transfusion				
20. Blood and blood components transfusion				
21. Estimation of the neonate with Apgar scale				
22. Estimaiton of the neonate with Silverman scale				
23. Reanimaiton of the newborn with asphyxia (respiratory distress)				
24. Obstetrical examination of the patient				
25. Examinaiton of the uterus neck with mirrows				
26. Colposcopy				
27. taking smears for gN				
28. Taking smears for atypical cells				
29. Estimation of cervical tests				
30. Probing of uterus				
31. Endometrectomy				
32. The student has carried out in addition (name)				

Students signature _____

Signaure of tutor , mark and seal _____
